

TUB DOOR WITH BACKWALL

DreamLine carries a line of durable and attractive backwall panels to be purchased separately or as a "kit". The kits are efficient and cost-effective, pairing some of our popular doors and enclosures with matching backwall units. The easy-to-maintain Acrylic/ABS panels are designed to be installed over an existing solid surface (not directly to studs) and may be trimmed-to-size. There are two styles available and both styles offer a size compatible for a Tub-to-Shower conversion project. QWALL-2 and QWALL-3 have a streamlined design with integrated shelves. QWALL-4, QWALL-5 and QWALL-TUB have a charming tile pattern and two integrated glass shelves.
