The exclusive factory applied DreamLine™ ClearGlass™ coating provides superior protection for shower glass. ClearGlass™ prevents mineral deposits, spotting, soap film and dirt from forming on the glass.

The MAJESTIC™ is a sophisticated shower enclosure designed to be installed against finished tile walls. The structure of the MAJESTIC starts with a black fiberglass reinforced acrylic base and a roof of black tempered glass. The pivot door has a full length magnetic latch for a watertight closure. The front and side walls are crafted from 5/16" thick tempered glass treated with our exclusive ClearGlass™ protective coating, for superior protection and easy maintenance. A stainless steel shower panel extends across the roof and down the exposed tile wall. An integrated controller allows for steam adjustment and provides access to lights, FM radio and MP3 sound functions. Three individual water diverters control the rain shower, jets and hand-held water functions. The built-in water management system includes a high performance thermostatic mixer to maintain a set temperature. Whether it's a simple shower, a jetted massage or a steam bath, the MAJESTIC truly lives up to its name.

MAJESTIC

- Black fiberglass reinforced acrylic base has opening for standard compression fitting drain (drain not included)
