

TUB DOOR WITH BACKWALL

DreamLine shower backwalls are easy-to-install and versatile, available in a range of sizes and configurations to complete your bathroom renovation. The backwalls can be purchased separately or as part of a kit. The kits offer an efficient and cost-effective solution by pairing our top selling shower doors and enclosures with coordinating backwall units. The wall panels are made from durable and attractive Acrylic/ABS materials, uniquely designed to be installed over an existing solid surface (not directly to studs), and may be trimmed-to-size. Transform your shower space into something fresh and new with a high quality and budget friendly DreamLine Backwall Kit.
