

DreamLine™

Bathroom of Your Dreams™

SHOWER COLUMNS

With features like a hand held shower, adjustable body message sprays, large top shower head and multifunction water controls – a DreamLine™ shower panel turns your ordinary shower into a home spa. The built-in thermostatic valve maintains a constant bathing temperature. Add other elements of design on select DreamLine™ shower columns - like shelves, mirrors, accessory compartments, individual water controls – and your shower not only gets a beauty makeover but also becomes more functional. Installation is easy with only a hot and cold water connection required and a fast mounting on enclosed wall brackets. Choose from models made of aluminum, acrylic or natural stone and a variety of options for the best solution for your shower.

SHCM-1008
